

Mechanical Designer /EIT

JDB Engineering, Inc. is a MEP Engineering Firm. With offices in Pennsylvania and Maryland, JDB's professional staff has a diverse project portfolio including food processing, health care, higher education, corporate, commercial and mixed use, and other markets. Our creative solutions are provided via the leadership of an experienced team of project managers that can guide a project from the initial stages of planning through design, construction, and occupancy. Specialized engineering services include mechanical, electrical, plumbing and process engineering for the Building Industry along with lighting design, building information management, and LEED / sustainable design. We have an immediate opening for a designer in the Mechanical Department in the York, PA office.

Responsibilities

This is an ideal opportunity for a high-energy individual who takes pride in their ability to take the initiative and make things happen! In this role, you will handle the following responsibilities and duties:

- Serve on multiple project teams and will work with mechanical engineers to successfully complete projects.
- Drawing setup, sequencing, and formatting.
- Sizing, selection, and layout of building mechanical system components.
- Preparation of construction documents for building mechanical systems.

Education & Experience Requirements

- Will possess either a 2-year Mechanical Engineering Technology Associates Degree or an accredited MEP Engineering or Architectural Engineering degree.
- A minimum of 1-5 years of experience in mechanical systems design/drafting and preparation of mechanical construction documents.
- Must have excellent communication skills.
- Working knowledge of REVIT and AutoCAD is required.

If you meet the requirements and are interested in exploring this opportunity, please send your resume and any additional credentials to: jobs@jdb.com
